Release Notes

Zimbra™ Collaboration Suite 2005 Network Beta

Release Overview

This release note refers to the *Zimbra Collaboration Suite 2005 Network Beta* release from Zimbra (formerly Liquid Systems). This release is intended to provide a basis for customers to trial the software and understand its end user and administration features. This release has been through early testing and quality cycles, but it has known outstanding issues and is not designed for customer production use.

Features Included

The *Zimbra Collaboration Suite 2005 Network Beta* is a next generation collaboration solution. It provides email, contacts and group calendaring functionality, along with rich, browser-based interfaces for both end users and administrators. A comprehensive feature list is available from Zimbra or on the Zimbra web site at www.zimbra.com

The *Zimbra Collaboration Suite 2005 Network Beta* also includes the following open source components:

- Postfix
- Apache Jakarta Tomcat
- OpenLDAP® software
- MySQL® software
- Apache Lucene search engine library
- James filter

Production Documentation

Zimbra documentation includes an Administrator's Guide, Quick Start Installation Guide for single server installation, and Zimbra Migration Wizard Guide to migrate accounts from Exchange to the Zimbra server. These are in PDF format.

Online help is available for administrators on the administration console and for end users on the Zimbra Web client interface.

The documentation is included in the installation or can be found on the Zimbra website.

Known Issues

For a list of known issues, see the release notes on the Zimbra website, www.zimbra.com/downloads.
