## Release Notes

### Zimbra™ Collaboration Suite

#### ***Release Overview***

This release note refers to the *Zimbra Collaboration Suite 3.0 Beta2* release from Zimbra. This release is intended to provide a basis for customers to trial the software and understand its end user and administration features. This release has been through early testing and quality cycles, but it has known outstanding issues and is, therefore, still considered a Beta-quality release.

#### ***Features Included***

The *Zimbra Collaboration Suite 3.0 Beta2* is a next generation collaboration solution. It provides email, contacts and group calendaring functionality, along with rich, browser-based interfaces for both end users and administrators. A comprehensive feature list is available on the Zimbra web site at [www.zimbra.com](http://www.zimbra.com).

The *Zimbra Collaboration Suite Beta* also includes the following open source components:

- Postfix
- Apache Jakarta Tomcat
- OpenLDAP® software
- MySQL® software
- Apache Lucene search engine library
- James filter

#### ***Production Documentation***

Zimbra documentation includes an Administrator's Guide, Quick Start Installation Guide for single server installations, Multi-Server Installation Guide, and a Zimbra Migration Wizard Guide to migrate accounts from Exchange to the Zimbra server. These are in PDF format.

Online help is available on the administration console and on the Zimbra Web client.

## Known Issues

Zimbra engineering has identified a number of issues with the software, and we are actively working to resolve them. Following are the ones that are most likely to occur. All known bugs are listed in Zimbra's Bugzilla database, which will soon be available on the Zimbra web site, at [www.zimbra.com](http://www.zimbra.com).

Issue #	Summary
<b>Zimbra Web Client Issues</b>	
	<p>If you use Firefox as your browser, known Firefox issues can effect how the Zimbra administration console and Zimbra Web Client work.</p> <p>When you get a Firefox error, try reloading the browser to continue.</p> <p><b>Note:</b> Zimbra does not support Firefox 1.5.</p> <p>Known issues with Firefox include 509, 943, 3812, 2939, 3812, 4020, 4455</p>
<b>442</b>	<p>If you use the Firefox browser, you cannot scroll the message content with the scroll wheel.</p> <p>No work around.</p>
<b>509</b>	<p>If you use the Firefox browser, the cursor position may not be visible in the text boxes, and you have no visual feedback to continue to enter text.</p> <p>Even though you cannot see the cursor, type in the boxes as normal.</p>
<b>943</b>	<p>If you use the Firefox browser, when composing a message, tabbing from one field to the next does not work correctly.</p>
<b>2939</b>	<p>If you use the Firefox browser and resize the browser to be smaller when you are in the Zimbra Web Client, the Zimbra user interface does not resize correctly.</p> <p>Reload the Zimbra Web Client in the smaller window. The vertical bar displays on the left, and the text of messages wraps correctly.</p>
<b>3812</b>	<p>Sometimes when you open a new message in Firefox, the <b>right-click Copy</b> or the <b>Control-C</b> function does not work.</p> <p><i>Work Around</i> Click <b>Reply</b> or <b>Forward</b>. The text in the message can then be copied.</p>
<b>4020</b>	<p>Sometimes you cannot copy HTML formatted messages. This is intermittent.</p>

Issue #	Summary
4455	<p>Sometimes when using the Firefox browser, while composing a message using the HTML format, if you move out of the compose body to do something else, such as add a cc:, you may not be able to click back into the body of the message.</p> <p><i>Work Around</i> Try to save your message as a draft. Otherwise, refresh your browser and start over.</p>
1919	<p>You may occasionally get an ambiguous error message. This is usually a network error.</p> <p>Reload the browser to continue.</p>
2723, 3062, 3363	<p>There are known issues with creating filters in Zimbra Web Client. When you try to create a filter, the options you select may not be retained.</p>
2886	<p>When you select to show external images in an HTML message, if the image is too tall, you cannot scroll the whole message. This has to do with the browsers timing-out before the message is loaded.</p> <p><i>Work Around</i> Close the message and re-open it again. Because the message is loaded from the cache, it opens before the timeout.</p>
3972	<p>While in conversation view, if you put your <b>Sent</b> folder in your <b>Inbox</b> folder, you cannot move messages that you sent to other folders.</p> <p><i>Work Around</i> Do not include your <b>Sent</b> folder under your <b>Inbox</b> folder.</p>
4165 4166	<p>Some error messages give an incorrect error message and ask you to send a report to Zimbra. Please do not send reports about the following types of errors.</p> <p>When you enter an incorrect email address, the error message that is returned states that it is a server problem and shows Send Report.</p> <p>When performing a search, you may get a Search Query error message that shows Send Report.</p>
4206	<p>If you get an error when attempting to log on to Zimbra Web Client, and you know you entered your logon name and password correctly, this is a server problem.</p> <p>Reload the browser and continue.</p>
4418	<p>Occasionally, the <b>All Attendees</b> row on the Free/Busy schedule (the top row) in Calendar does not sum all the attendees' data correctly.</p>

Issue #	Summary
4484	<p>If you accept a meeting invitation at the same time as your Zimbra Web Client session has timed out, when you log back on, the Overview panel is blank.</p> <p>Reload the browser and re-log on.</p>
4508	<p>Disabling the <b>Saved Searches</b> feature in a COS does not remove the Save Search folder in the Zimbra Web Client Overview pane.</p>
4516	<p>Disabling <b>Tagging</b> in a COS does not remove Tags from the Zimbra Web Client Overview pane.</p>
4517	<p>Disabling <b>Advanced Search</b> in a COS disables the Advanced Search feature and the Search Save button.</p>
4519	<p>Disabling <b>HTML Compose</b> in a COS does not disable this feature on the Zimbra Web Client.</p>
4595	<p>When you open a compose window from the <b>Contacts, Detailed Cards</b> view, sometimes the Detail Card remains open and moves along with the mouse, until you click the mouse on the compose window.</p>
4636	<p>Within the <b>Options</b> function, <b>Save</b> and <b>Cancel</b> do not behave correctly.</p> <p>When you go to Options, change a preference and then click Cancel, and close Options, no confirmation dialog displays a warning that you have made changes. The Options view does not clear your changes, but the changes do not take effect.</p> <p>If you are in Options view and click Inbox to return to your Inbox, even though you made no changes, a dialog opens asking if you would like to save your changes.</p>
3448	<p>If you are using Thunderbird through IMAP as your email client to the Zimbra server, you may receive chronic pop-ups notifying you of “x new messages,” but when you look at your messages, you may not have any new messages at all</p>
<b>Administration Issues</b>	
4582	<p>View Mail Issue. If you use Firefox, and you select to <b>View Mail</b> for an account, when you select another account to View Mail, instead of getting that account’s view, you continue to view the first account’s mailbox.</p> <p>Log out of the first account’s mailbox, and close the client window before selecting and opening another account’s mailbox for view.</p>

Issue #	Summary
4638	<p>Distribution Lists. When you right-click on a distribution list and click <b>New</b>, the New Accounts Wizard opens instead of the New Distribution List page.</p> <p>You can click <b>New</b> from the <b>Distribution List</b> toolbar to open a new Distribution List.</p>
4645	<p>Accounts. Right-click on an account to <b>Edit</b> and <b>Delete</b> may not work correctly.</p> <p>If you want to delete an account, make sure that only the account to be deleted is highlighted. If you have another account also highlighted, the wrong account may be deleted.</p> <p>Use the toolbar, <b>Edit</b> feature to edit accounts.</p>
2836	<p>For IMAP clients, Search folders are read-only.</p>
1363	<p>When using the Zimbra Migration Wizard to import messages and attachments, any attachments larger than 5MB cannot be imported. Message attachments that are too large are replaced with a short text/plain attachment indicating that the attachment was too large.</p> <p>No workaround.</p>
