Release Notes for Zimbra™ Collaboration Suite 3.0 Beta3 Update   Open Source Edition

Release Overview

This release note refers to the *Zimbra Collaboration Suite 3.0 Beta3 Update Open Source Edition* release from Zimbra, Inc. This release is intended to provide a basis for customers to trial the software and understand its end user and administration features. This release has been through early testing and quality cycles, but it has known outstanding issues and is therefore still considered a Beta-quality release.

Features Included

The *Zimbra Collaboration Suite 3.0 Beta3 Update Open Source Edition* is a next generation collaboration solution. It provides email, contacts, and group calendaring functionality, along with rich browser-based interfaces for both end users and administrators. A comprehensive feature list is available on the Zimbra web site at www.zimbra.com

Production Documentation

Zimbra documentation includes an Administrator's Guide, Quick Start Installation Guide for single server installations, Multi-Server Installation Guide, and a Zimbra Migration Wizard Guide to migrate accounts from Exchange to the Zimbra server. These are in PDF format. Online help is available on the administration console and on the Zimbra Web client.

Known Issues and Upgrade Instructions

Go to www.zimbra.com/community and select **Documentation.** The latest Open Source Edition Release Notes with a list of known issues and the upgrade instructions is posted there.

Bug Reporting

If you encounter problems with this software, go to http://bugzilla.zimbra.com to submit a bug report. Make sure to provide enough detail so that the bug can be easily duplicated. Also, to discuss issues and this software in general, please visit our community forums at http://www.zimbra.com/forums.
